The Arts Policy

Rationale
Within the Arts students communicate, challenge and express their own and others’ ideas. They develop perceptual and conceptual understanding, critical reasoning and practical skills through exploring and expanding their understanding of their world, and other worlds. Students learn about the relationships between the viewer and artworks/performance and how these can be presented to enhance meaning for the viewer.

The Arts engage students in a journey of discovery, experimentation and problem-solving, utilising techniques, technologies, practices and processes. Learning in the Arts leads students to become increasingly confident and proficient in achieving their personal forms of expression, appreciating and valuing that of others. It helps students to develop understanding of world cultures and their responsibilities as global citizens.
